AMAkids: open an education center with a proven international EdTech model

Education franchise for entrepreneurs

12 years | 20+ countries | 800+ centers | 100,000+ students

Four reasons the AMAkids model works for partners

Ready method

Proven teaching methods and printed books for every course.

Own platform

CRM, analytics, video module, 100+ educational games and a mobile app.

Partner training

Hands-on training so your team can teach the method from day one.

Support at every step

Launch guidance and ongoing technical and operational support within the agreed partnership scope.

Three ways to partner with AMAkids

Single-Unit

For new entrepreneurs

Start a business from scratch, on a proven model.

Why choose this model

- Known name: launch under the AMAkids brand
- Ready-made model: courses, brandbook, training, platform
- Support from launch onwards, technical and operational

What to plan for

- Premises and a team of trainers
- Local marketing and daily operations
- Investment: depends on the market

School Partnership

For existing schools

Add a program to what you already have.

Why choose this model

- You already have the audience and the location
- Ready-made methodology, no need to build your own
- Full package or individual programs

What to plan for

- Trainers prepared for the chosen programs
- Local promotion to your own audience
- Terms depend on the programs and scope

Master Franchise

For regional developers

Own a territory and grow it.

Why choose this model

- Exclusive rights to a defined territory
- Earn from every partner in your sub-licensed network
- Run your own centers alongside the network

What to plan for

- Building and managing a partner network
- Regional marketing and recruiting partners
- Territory and terms agreed individually

What's in the AMAkids methodology package

The current English-language offer includes three programs for children and teens. Take the full package or choose individual programs.

Mental Arithmetic

English

Memorika

The package includes

Ready-made programs and lesson structure

Books and learning materials

Educational games and online practice

Methodology guidance for trainers

Mental Arithmetic

Ages 5–16 · **Duration: 2 years** · 1 lesson per week, 90 min

Use abacus-based and mental calculation exercises to develop children’s learning skills.

Addition & Subtraction

Multiplication & Division

Learning tools

Platform + mobile app

Textbooks with augmented reality

Abacuses

English

Ages 4–14 · **Duration: 2–4 years** · 2 lessons per week, 60 min each

A0	A1	A2	A2+

Learn to think, understand and speak English. Grammar · Vocabulary · Speaking · Writing · Phonetics · Listening · Reading

Learning tools

Web book

Platform

Workbooks

Extra preparatory level 0 (Pre-A0) before A0 · The course covers levels A0–A2+

Memorika

Ages 7–16 · Duration: 12 + 12 + 4 lessons by level · 1 lesson per week, 90 min

Move from memorizing to consciously managing information through visual and systemic thinking.

Junior

12 lessons

Senior

12 lessons

Geo-orientation

4 lessons, for course graduates

6+ memory training methods; memory coefficient measured at lessons 1 and 12.

Learning tools

Platform

Workbooks

Presentations

Five reasons AMAkids stands out

Progress from the first lessons

Progress is made visible from the first lessons, with increasingly advanced skills as students continue.

Own platform and motivation system

Supports practice between lessons, with new tasks and goals that keep children interested.

Full-featured CRM

Tools for managing the business day to day and keeping operations organized.

Teacher preparation and training

Course-specific training and structured methodological materials prepare teachers to deliver the selected programs.

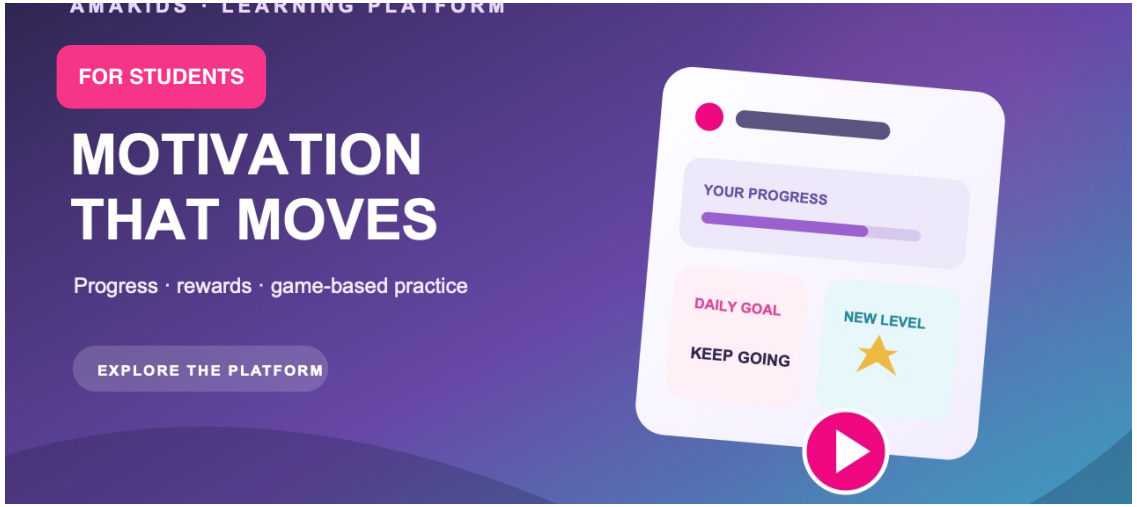

Regular Olympiads

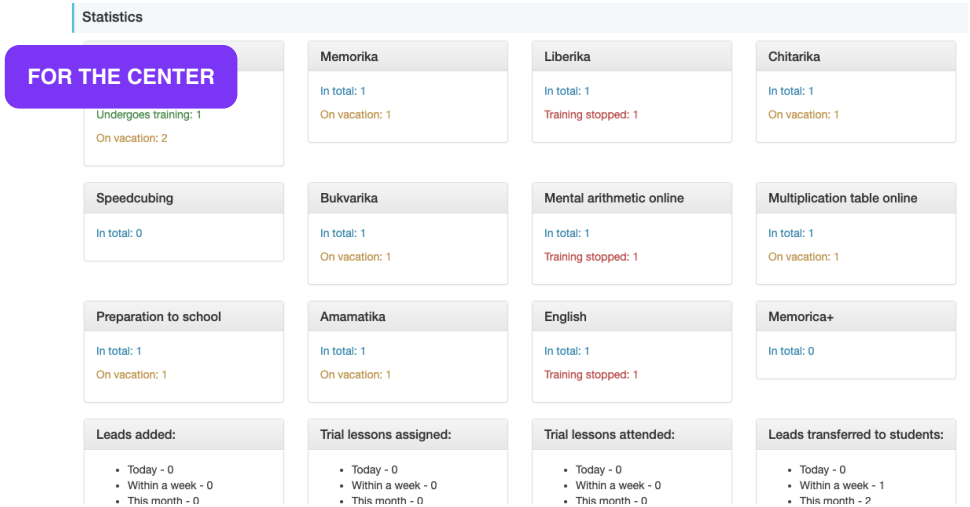

Every child gets a goal, a chance to show their achievements and to feel part of a big community.

PLATFORM + CRM

One digital ecosystem for learning and operations

Engage students between lessons and keep the center’s daily work organized in the same AMAkids ecosystem.

Learning platform & mobile app

Games, neurotraining, ratings, medals and online practice help students see progress and stay motivated between lessons.

AMAkids CRM

Manage branches, leads, students, trial lessons, groups, schedules, pricing and performance statistics in one workspace.

ONGOING SUPPORT

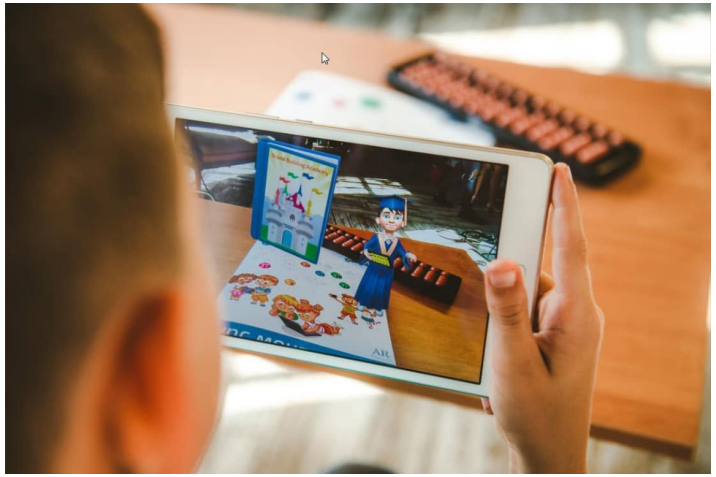

Technical and operational guidance helps the partner set up the tools and use them in daily work within the agreed support scope.

TEACHING TOOLKIT

Everything a trainer needs for every lesson

A prepared teaching package reduces lesson-planning time and helps teams deliver the selected program consistently.

READY TO USE

01

Lesson structure

Step-by-step plans, presentations and trainer guidance for each stage of the course.

02

Student materials

Printed workbooks, textbooks, web books and abacuses, depending on the program.

03

Digital practice

Platform activities, educational games, homework and progress tools between lessons.

04

Interactive formats

Augmented-reality materials and visual demonstrations that make practice more engaging.

Materials and formats vary by selected program and market.

Commercial terms by partnership model

The formats differ in legal scope, territory and the partner’s development responsibility.

TERM	Single-Unit	School Partnership	Master Franchise
Agreement	International Commercial Concession Agreement	License Agreement	International Commercial Concession Agreement with sub-licensing rights
Standard monthly royalty	**10%**	**10%**	**5%**
Territory & exclusivity	One or more centers within a limited territory, usually a city	Program licensed to a specific educational institution	Exclusive development rights for an agreed country or region
Partner’s main objective	Build brand awareness and develop the center consistently	Maintain a stable flow of students for the licensed program	Represent the brand regionally and drive network expansion

Commercial terms and territory definitions are reflected in the final individual offer and signed agreement.

What your investment includes

Initial AMAkids payment

Registration and legal setup

Deposit, renovation and premises preparation

Furniture and equipment

Equipment and learning materials

Branding and design

Launch advertising

Team recruitment and training

Working capital reserve for the first months

Price is set individually, depending on country, format and scale.

ECONOMICS

How a center builds toward profitability

Profitability is the outcome of a connected operating system—not one headline metric.

01

Attract

Reach the right local families

→

02

Convert

Turn enquiries and trials into enrollments

→

03

Fill groups

Use classroom and trainer capacity well

→

04

Retain

Deliver value and support re-enrollment

→

05

Scale

Open new groups when demand supports them

REVENUE ENGINE

Active students × realized monthly price

Enrollment, group occupancy and retention determine how much capacity becomes revenue.

COST DISCIPLINE

Acquisition + team + space + operations

Costs must match the center's stage, local price level and realistic enrollment plan.

The model should be stress-tested for your city, tax environment and chosen format.

Example: one Single-Unit center, 3 years

Starting point: 24 students and 6 groups at opening; 48 students as the 12-month target; 3 learning products.

Opening investment

€16 700

Operating break-even

Month 2

Investment payback

21 months

PLANNING EXAMPLE · NOT A FORECAST

	Year 1	Year 2	Year 3
Groups	7	9	11
Students at year-end	48	68	85
Net revenue	€48 213	€71 902	€91 319
EBITDA	€6 175	€11 650	€23 927
EBITDA margin	**12.8%**	**16.2%**	**26.2%**

Staffing included: administrator from launch, full administrator capacity from month 7, and 0.5 FTE center director from Year 2.

Illustrative model based on an average course price of about €100 per month. Results depend on actual enrollment, retention, local taxation and operating costs.

Indicators of a successful center

ILLUSTRATIVE BENCHMARKS · VALIDATE LOCALLY

KPI	Target level
Seat occupancy	85–90%+
Average group size	9–10 students
Monthly churn	≤3%
Annual re-enrollment	≥70%
Lead-to-paid conversion	9–12%
Rent and occupancy costs	≤15% of revenue
Total people cost	≤30% of revenue
Ongoing marketing	≤10% of revenue
Mature EBITDA margin	**≥20%**
Cash reserve	2–3 months of fixed costs

From signed agreement to opening day

Typical preparation · around 3–6 months

01

Agreement

Confirm the model and available territory.

02

Training

Partner training and course-specific trainer preparation.

03

Setup

Fit out the classroom and set up CRM.

04

First families

Launch marketing and trial lessons.

05

Opening

Open your AMAkids center.

LEARNING ENVIRONMENT

What an AMAkids center can look like

A bright, welcoming space for small-group learning—adapted to the premises, local regulations and chosen programs.

Brand identity · classroom technology · teaching tools · flexible small-group layout

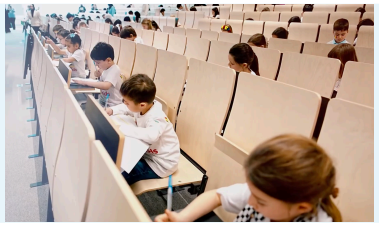

COMMUNITY & MOTIVATION

Events that make progress visible

From local Olympiads to international stages, students get goals to work toward and moments worth celebrating.

Regular event formats

- Local Olympiads organized by AMAkids partners
- Large international Olympiads and community events
- Annual international online tournament
- Mental-arithmetic battle for students

Events may vary by market and season.
